Stormwater Treatment

Meeds' Mobile Water Treatment Facility

Meeds Environmental, LLC. provides advanced technical equipment and expertise in the area of mobile water filtration and industrial stormwater treatment.

Meeds is headquartered in Woodinville, WA. With our mobile systems we can work with projects nationwide. Our Mobile Water Treatment Facilities are designed based on customer needs and have capacity to filter up to 1000 gallons per minute.

Applications for Meeds' Chitosan-Enhanced Sand Filtration Systems Include:

- Construction Stormwater Treatment
- Industrial Stormwater Treatment
- Environmental Remediation

We seek to protect the environment, communities, and habitats surrounding industrial development sites through customized wastewater management solutions. Meeds Environmental provides the tools necessary to ensure compliance with Federal EPA and the NPDES Industrial Stormwater Permit standards and regulations. We offer our clients a solution for their ongoing needs to achieve sustainable development.

Meeds' Filtration Systems Improve Water Quality by Removing:

- Turbidity (suspended sediment and particles)
- Oils and Greases and other Hydrocarbons
- Heavy Metals (including copper, lead and zinc)

In the treatment process we also ensure monitoring and adjustments of pH and conductivity in order to achieve optimal treatment results.

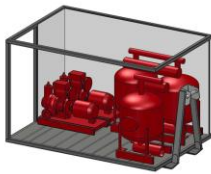

Meeds Environmental is the Environmentally Friendly Solution:

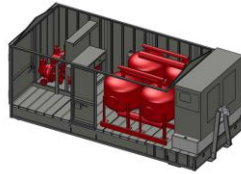

- An industry tested filter made from biodegradable and non toxic material
- Rapidly deployed portable units with remote real time monitoring

Meeds' Products Provide:

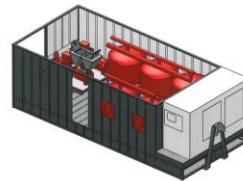

- High quality reliable filters resulting in consistent outputs
- Small footprint provides for ease of siting and startup
- Steel shell with heating system and secure entry prevents interruption to service
- Washington Department of Ecology approved technology for strict compliance with environmental legislation
- Flexible pricing strategy with various options to lease, own, or pay per gallon
- A cost effective alternative to old ways of managing polluted water
