Industrial Stormwater Treatment

Meeds Environmental, LLC. provides advanced technical equipment and expertise in the area of mobile water filtration and industrial stormwater treatment.

Meeds' is headquartered in Woodinville, WA. With our mobile systems and innovative industrial stormwater treatment technology we can work with projects nationwide.

We seek to protect the environment, communities, and habitats surrounding industrial development sites through customized wastewater management solutions. Meeds Environmental provides the tools necessary to ensure compliance with Federal EPA and the NPDES Industrial Stormwater Permit standards and regulations. We offer our clients a solution for their ongoing need to achieve sustainable development.

Meeds' treatment systems combine industry leading technology with customized options for treatment, water storage capacity and monitoring. Our treatment solutions protect the environment and make state of the art water treatment affordable for small and large sites.

Meeds' Filtration Systems Improve Water Quality and Achieve NPDES Target Levels for:

- **Heavy Metals (including copper, lead and zinc)**
- **Turbidity (suspended sediment and particles)**
- **Oils and Greases and other Hydrocarbons**
- **pH**

Introducing Meeds Environmental's Industrial Stormwater Treatment System:

- **Based on the specific conditions for any site, we will design your treatment system to fulfill all treatment needs.**
- **Electronic monitoring ensures that treatment is always achieved and prevents a non compliant discharge.**
- **Treatment data can be sent wirelessly in real time to anywhere, including your smart phone or tablet.**
- **Steel shell with secure entry protects filters, pumps, chemistry and electronic systems from the weather, theft and vandalism.**

With Meeds' stormwater treatment system you may qualify for a credit on your drainage bills and save money.
